

Skill Coverage Checklist

Every skill in the curriculum, with a box per stage — tick as you verify each in the admin question preview

www.pedmas.com · 2026-08-21

The automated suite already generates and validates questions for every one of these skills at every stage in both regions on every test run — this checklist is for the judgement a machine cannot make: does the question feel right for the grade, is the wording clear, would a child understand it? Open / admin, use the question preview for the skill and stage, and tick the box. The five boxes are stages 1–5; L means the skill's lesson has been read.

- The diagram consists of two horizontal rows. Each row contains five identical empty squares. To the right of these five squares, at the end of each row, is a sixth square. This sixth square is divided vertically, with the letter 'L' written in the right half. The entire diagram is rendered in a light blue color.
